

# VERTEK

Vertical form & seal

The VerTek family of vertical form & seal machines are reliable, durable, easy to use and affordable.

Designed with the operator in mind, the VerTek series is amongst the most serviceable, accessible, cleanable and user friendly vertical form & seal bagging machine on the market today.

Using roll stock film, the VerTek can produce a variety of finished bag styles including stick pack, pillow and gusseted pouches.

**FEATURES & BENEFITS:**

- Reliable components including SMC pneumatics, Bimba cylinders, color HMI and Omron PLC.
- Open frame design allows for easy accessibility of components for servicing.
- Can operate on both polyethylene and laminate materials.
- Designed for low cost of maintenance using off-the-shelf components.
- Tool less removable forming tube and contact parts.
- Interfaces easily with auxiliary equipment.
- Motor operated film unwind assembly for precise film tension control.
- Multi choice pre-programmed sequence of operation, seal above or below seal jaws.
- 3 separate digital temperature controls integrated into touch screen.
- Photo cell for bag registration.
